High Performance Laser Faxes
FAX-L2000 / FAX-L2000IP

*Experience the ultimate
in faxing efficiency*

From high speed multi-tasking to internet faxing

Enhance efficiency, save time and cut costs with the most complete laser fax for dynamic corporate environments. High speed performance for heavy-duty faxing - as well as fast network printing and convenient copying - provides unparalleled productivity. All combined with high quality sending, simplicity and total security for sensitive documents.

The FAX-L2000 is the ideal choice for medium size companies and departments with a demanding workload. While the unique Canon FAX-L2000IP opens new horizons for highly effective faxing. Fully utilising your organization's internet platform, it features intelligent send, receive and forward functions to speed up and simplify overall document management.

FAX-L2000: heavy-duty performance

ENHANCED PRODUCTIVITY

The durable design of the FAX-L2000 makes it ideal for rapid and reliable high-volume faxing. The large standard paper capacity of 600 pages reduces the need for constant paper refilling. A huge standard memory of 512 pages* stores both your incoming and outgoing faxes. Other time-saving features include dual access - allowing you to carry out different functions simultaneously - and a 70-page Automatic Document Feeder.

* Based on ITI-T standard chart NO.1.

CUTTING PHONE AND LABOUR COSTS

Keep your company phone and labour costs down to an absolute minimum, thanks to ultra fast Super G3 transmission. A fallback capability allows full reception of multiple faxes without blocking the line. Up to 200 fax numbers can be stored in memory (72 one touch/128 coded) for faster dialling. Scanning speed is a rapid 1.2 pages per second (A4). Plus an 18 pages per minute printing speed delivers your faxes instantly.

**SUPER
GB**

SUPERIOR IMAGE QUALITY

Whether you're faxing fine text, diagrams or even photographs, you can always rely on Canon's exclusive UHQ (Ultra High Quality) technology for superior sending. Ensuring extra depth and clarity for all your detailed work. A high print resolution of 1200 x 1200 dpi offers equally high quality for all incoming faxes. Thus you always benefit from exceptional image quality.

COMPLETE CONFIDENTIALITY

Up to 50 confidential mailboxes are available - offering users total security for all sensitive documents. Documents can then be received in memory and are only printed out when a password is provided. A forced reception feature ensures that all documents stay in memory and are only printed out on request. While direct mail prevention eliminates unwanted faxes.

FAX-L2000IP: intelligent internet faxing

COST-EFFECTIVE INTERNET FAXING

With the FAX-L2000IP, you can send all your international faxes via your existing internet connection to compatible i-fax devices at reduced rates. And you benefit from all the productive features of the FAX-L2000 with the added advantage of unique send, receive and forward functions to transform your entire office workflow.

AN INTELLIGENT WORKFLOW

Paper documents can be scanned into your system for direct distribution to i-fax and email addresses. Faxes can also be sent to a file server for storage. Plus you can route all incoming faxes automatically - allowing them to be shared and worked on by authorised users on the network. Acting as a central communication hub, the FAX-L2000IP lets you collect, share, manage and store all your office documents digitally.

POWERFUL NETWORK PRINTING

As the FAX-L2000IP features standard network connectivity, the unit can also be used as a fast, flexible and high quality printer for every PC on your network. Speed is a rapid 18 pages per minute, with a razor-sharp print resolution of 1200 x 600 dpi. Thus it's ideal for use as a back-up printer - or it can even serve as the main printer for departments and workgroups.

MANAGE IT ALL EASILY

A Remote User Interface (RUI) allows direct desktop control from connected PCs. Users can issue print commands, check on status and carry out a wide range of functions, via the built-in web browser function. Plus handy network management tools let administrators maintain and monitor use remotely - complete with full accountability so costs can be reduced.

Upgrade as your business expands

HIGH VOLUME PAPER CAPACITY

An optional 500-sheet paper cassette for both the FAX-L2000 and FAX-L2000IP takes the total paper supply up to 1100 sheets. Simply add it on whenever you want - to meet the most demanding needs for high volume faxing and printing in the future.

BENEFIT FROM MORE MEMORY

With both faxes, you can also boost the standard 8MB memory right up to 32MB. This offers a massive 1500-page storage memory for high volume faxing - without any risk of missing a fax even if paper runs out. Also an optional handset can be added to either model for full phone/fax use.

NETWORK PRINTING (FAX-L2000)

Add on an optional network and printer board and transform the FAX-L2000 into a powerful and productive network printer. It adds to overall efficiency, saves space and saves you the cost of having to buy an extra printer as and when the need arises.

INTERNET FAXING (FAX-L2000)

If internet faxing is a feature that might interest you in the future, no problem. The FAX-L2000 can be easily upgraded to an internet fax at any time - thus offering your organization all the intelligent, time-saving workflow functions of the FAX-L2000IP.

FAX-L2000/FAX-L2000IP Specifications

FAX unit type
