Recycling used cartridges

Canon has instituted a world-wide recycling programme for toner cartridges. This programme preserves precious natural resources by utilising a variety of materials taken from used cartridges to manufacture new cartridges. This also keeps the environment cleaner by reducing landfill waste. Complete details concerning this programme is running in most European countries, some are still in the preparation phase. For more details, contact your national Canon distributor.

FAX-L360

*Do I look like I would trust
my important documents to
just any fax machine?*

FAX-L360

How important is the fax machine to your business? Just ask yourself how important your documents are and how many people need to use the fax on a daily basis and you got the answer: you need a machine that can handle that kind of capacity.

THE FAX THAT NEVER FORGETS

Canon's FAX-L360 is an A4 plain paper laser fax. It holds 350 sheets of paper so the whole office can fax away all day without having to refill the paper several times. When paper does run out, its huge 400-page memory takes care of incoming faxes until the paper supply is restored. If the machine runs out of toner, the memory again stores incoming faxes until the cartridge is replaced. Your business will never miss a fax.

FAST, FASTER, FASTEST

For a smooth running business it's crucial that time spent on the fax machine is kept as short as possible. Frequently dialled numbers can be stored under the 32 one-touch dial buttons. Together with another 100 speed dials they provide valuable time saving as does the fast Super G3 modem. Rapid scanning of faxes before they are sent out further diminishes waiting time.

FAX, PRINT, COPY

The USB connection enables you to use the FAX-L360 as a high-resolution laser printer. It prints at 600 dpi so you get great quality prints. The same goes of course for incoming faxes. Using the FAX-L360 as a copier is another option. You can copy up to a solid 99 pages at once.

All-In-One cartridge for easy toner replacement

Clear display for easy operation

USB interface for direct connection to computer

QUICK 'N CLEAN TONER REPLACEMENT

Toner of the FAX-L360 will last a long, long time. But replacing it is a quick and simple job because toner, cleaner and other key parts all sit together in one easy replaceable unit. This All-In-One cartridge will keep your faxes as well as your hands clean. So, whatever business you're in, you can trust the FAX-L360 to grow with it.
